Join us for this annual nursing education event. Safe work environments are key to nursing safety. Safety encompasses physical safety, emotional safety and psychological safety. Come hear from a panel of nurses about how they keep “safety first” at work. Then relax and enjoy some “self-care” sessions to help you maintain balance in your life. You can explore tai chi, mindfulness, pet therapy and traditional indigenous healing therapies.

Event Objective:

Explore safe work environments through a nursing lens.

Share stories from front line nurses on how to keep safety first at work.

Experience self-care strategies that may help nurses maintain a work-life balance.

Agenda Overview
