1

Signs of an Opioid Overdose

Soft/no breath
or snoring

Pinpoint
pupils

Blue lips, nails,
or skin

Cold,
clammy skin

Limp
body

Doesn't respond
to shouting

2

Call 911

3

Give Naloxone

Peel the
package open

Place your thumb
on the plunger

Press plunger
firmly into nostril

4

Check The Person's Breathing

Breathing

Put person in
recovery position

- Hand supports head
- Knee stops body from rolling onto stomach

Rescue breathing:
Tilt head back, lift
chin, pinch nostrils
closed, give breaths

Compressions:
Push hard and fast in
center of chest to the
beat of *Stayin' Alive*

Not Breathing

Give rescue breathing
and/or chest compressions

5

Stay Calm

If no improvement after 2-3 minutes, give another dose and continue rescue breathing and/or chest compressions until help arrives
