

Quarterly Opioid Situation Report

Grey Bruce, Jan-Mar 2026

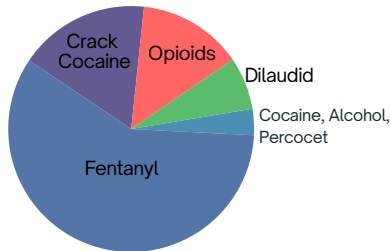

The **Opioid Situation Report for January to March 2026** outlines details of the reports of suspected opioid related overdoses received through the Grey Bruce Early Warning System. For this system, reports of suspected opioid-related events are sent to Public Health primarily from EMS, plus Police, Fire, and our *211 Report a Bad Drug* Online Form/Call-in process. If warranted, an alert designed to advise the community of potential increased risk related to opioids in the area is issued to community partners and the general public to ensure a rapid, coordinated, multisector response to local opioid-related events.

Timeframe	# of Opioid-related Overdoses	# of Opioid-related Fatalities	# of Alerts	# of Media Releases
Jan-Mar 2025	15	1	0	0
Jan-Mar 2026	50	1	6	0

100%

Naloxone was used in 40 of the reported overdoses and was **successful in reversing the overdose every time.**

Reported Drugs
Information on suspected substances provided in 32/50 reports

Distributed 1027 Naloxone Kits

Trained 259 people to use Naloxone
