

Pick-up & Drop-off Locations for Well Water Testing Program

Please note: Water samples must be tested by PHO within 48 hours of when you collect the sample in your home to ensure sample integrity. Therefore, it's critical that you collect the sample and drop it off at your preferred or nearest location as close to the scheduled courier pick-up time as possible. Ideally, you will do this on the scheduled pick-up day – before the courier arrives – but you can also collect the sample and drop it off the day before pick-up day.
