Figures 9 & 10. **Statistics Canada, 2016 Census of Population, Catalogue no. 98-400-X2016242.** <http://www12.statcan.gc.ca/census-recensement/2016/ref/98-501/98-501-x2016012-eng.cfm>

\* Data specific to Neyaashiinigmiing and Saugeen First Nations are not included in this report due to high non-response rates (24.9% and 37.8% respectively)

\* Data in this release are based on the short-form census which samples 25% of the population. Statistics Canada calculates estimates for the entire population based on this sample.

\* To ensure confidentiality, the values, including totals, are randomly rounded either up or down to a multiple of '5' or '10.' To understand these data, you must be aware that each individual value is rounded. As a result, **when these data are summed or grouped, the total value may not match the individual values** since totals and sub-totals are independently rounded. Similarly, **percentages, which are calculated on rounded data, may not necessarily add up to 100%.**

# Key Indicators

## Educational attainment

This census indicator refers to the highest level of education that a person has successfully completed. In 2016, 12.3% of adults aged 25-64 years in Bruce County, and 15.3% in Grey County had not successfully completed any educational certificate, diploma, or degree (Fig. 1). Both counties, especially Grey County, had higher rates of people in this age group that had not completed any educational qualifications than Ontario (10.4%), and Canada (11.5%). Most Grey Bruce municipalities had more adults with no educational qualifications relative to Ontario (Fig. 2). Southgate had the highest proportion of adults with no educational qualifications by a wide margin, at 28%. The next highest municipalities are Hanover, at 18%, West Grey at 17.4%, and Grey Highlands at 17.2%.

A high school diploma or equivalency certificate was the highest educational qualification among 26.4% of adults aged 25-64 years in Bruce County, and 28.8% in Grey County- higher than the provincial proportion of 24.5% and the national proportion of 23.7% (Fig. 1). The proportion of adults whose highest level of education is a high school diploma or equivalency certificate is higher than Ontario in every Grey Bruce municipality except Saugeen Shores (Fig. 3). About 61% of adults in Bruce County and 56% in Grey County had completed a postsecondary certificate, diploma, or degree in 2016. Fewer adults in both counties had postsecondary qualifications relative to Ontario (65.1%) and Canada (64.8%), particularly in Grey County (Fig. 1). Most Grey Bruce municipalities have fewer adults with postsecondary qualifications relative to Ontario, excluding Saugeen Shores, The Blue Mountains, and Kincardine (Fig. 4).

**Figure 1. Educational attainment (%), 25-64 year olds, 2016**

**Figure 2. 25-64 year olds with no educational qualifications (%), by municipality, 2016**

**Figure 3. 25-64 year olds whose highest educational qualification is high school (%), by municipality, 2016**

**Figure 4. 25-64 year olds who have completed postsecondary education (%), by municipality, 2016**

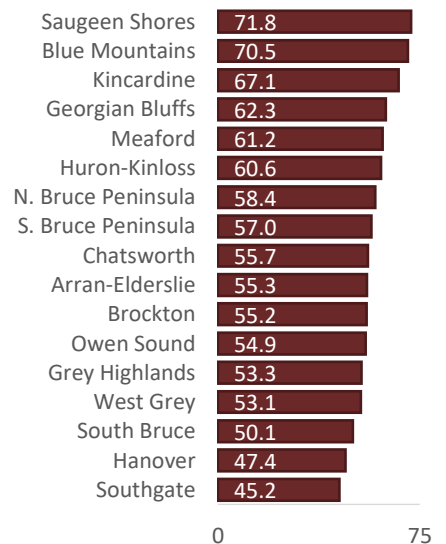

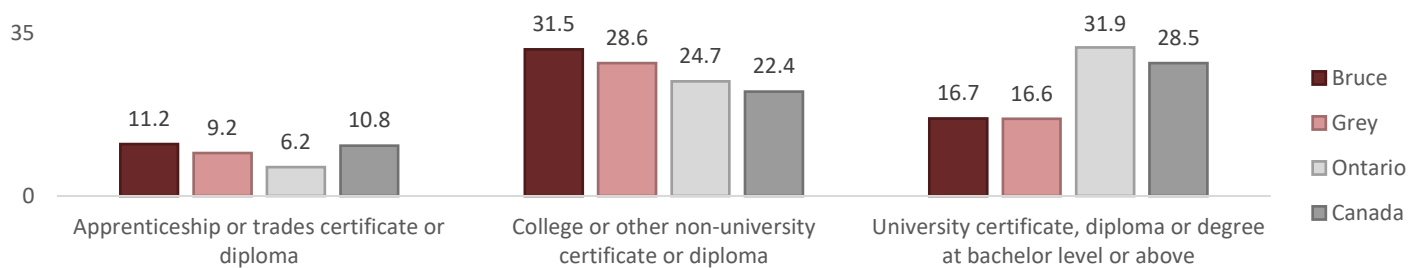

Figure 5 displays postsecondary educational attainment among adults aged 25-64. In 2016, 11.2% of adults aged 25-64 years in Bruce County and 9.2% in Grey County had completed an apprenticeship or trades certificate or diploma. These proportions are higher than Ontario, at 6.2%, and similar to Canada at 10.8%. A college diploma was the highest level of education completed among more adults in Bruce and Grey counties relative to Ontario and Canada- about 32% of adults in Bruce County and 29% in Grey County, compared to 24.7% in Ontario and 22.4% in Canada. The rate of completing university qualifications at or above the level of a bachelor’s degree was substantially lower in both counties than Ontario and Canada. In Bruce County, 16.7% of adults aged 25-64 years have a bachelor’s degree or higher, as did 16.6% in Grey County, compared to 31.9% in Ontario and 28.5% in Canada. A small proportion of adults had completed a university certificate or diploma below the bachelor level- 1.9% in Bruce County, 1.6% in Grey County, 2.4% in Ontario, and 3.1% in Canada (not included in figure). See [Table 1](#) for more a more detailed breakdown of postsecondary qualifications (p. 8), and [Tables 3 and 4](#) for more detail at the municipal level (p. 10).

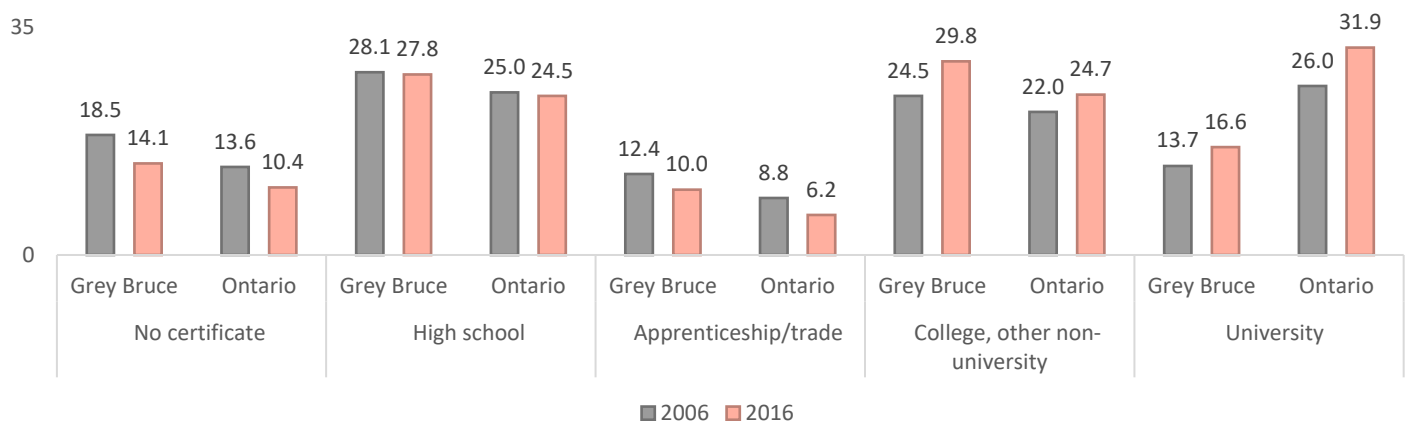

**Figure 5. Postsecondary educational attainment (%), 25-64 year olds, 2016**

### Educational attainment: Ten-year change

Figure 6 compares educational attainment among adults aged 25-64 in Grey Bruce and Ontario between 2006 and 2016. Trends in educational attainment in Grey Bruce over the past ten years are consistent with provincial trends. Fewer adults in Grey Bruce had not completed any educational qualifications in 2016 (14.1%) than in 2006 (18.5%). The proportion of adults whose highest educational qualification was a high school diploma or equivalent remained stable in Grey Bruce, at around 28%. An apprenticeship or trades certificate or diploma was the highest educational qualification among slightly fewer Grey Bruce adults from 2006 (12.4%) to 2016 (10%). A growing proportion of Grey Bruce adults earned college and university qualifications between 2006 and 2016. A college diploma was the highest educational qualification attained by 29.8% of Grey Bruce adults in 2016, up from 24.5% in 2006, and university qualifications were attained by 16.6% of Grey Bruce adults, up from 13.7% in 2006.

**Figure 6. Educational attainment (%), 25-64 year olds, 2006-2016**

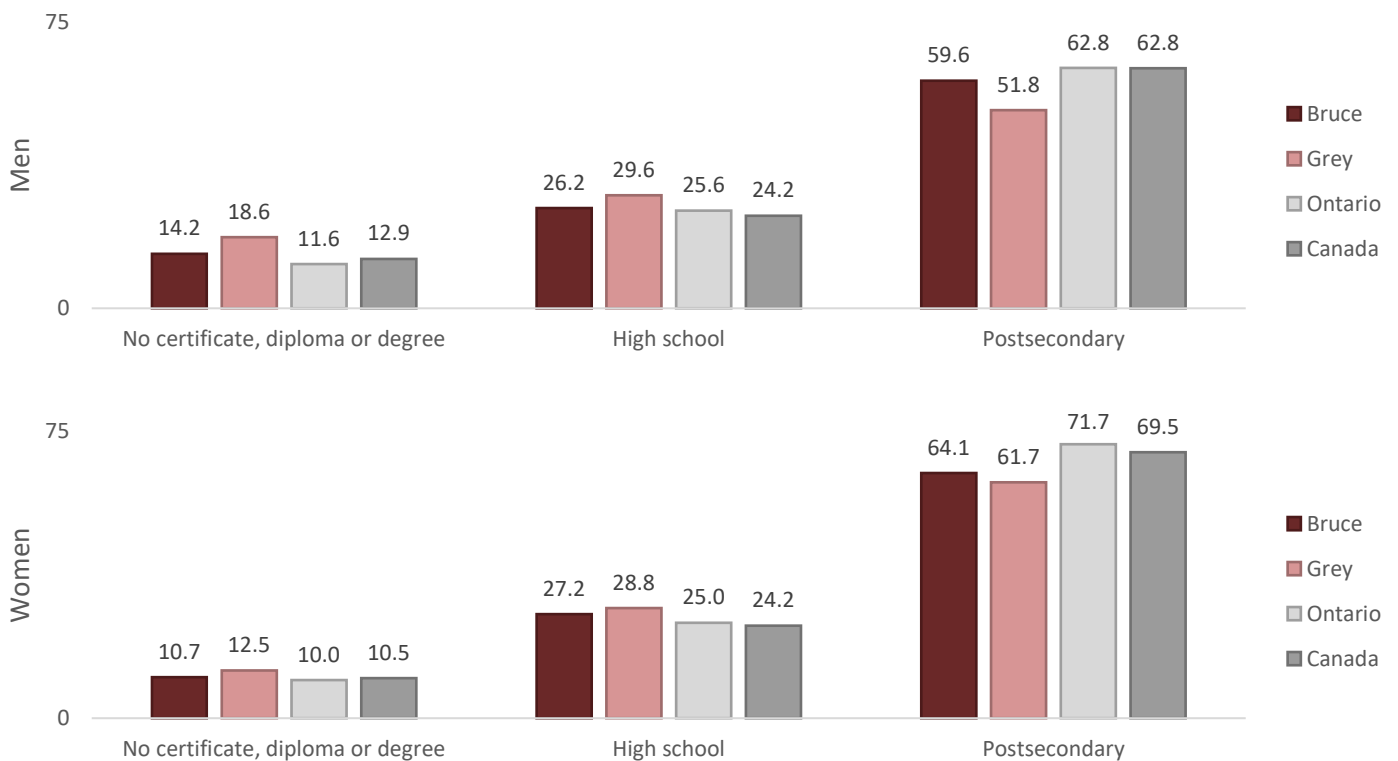

## Educational attainment: By sex

Figure 7 presents educational attainment among men and women aged 25-64. More men in Bruce and Grey counties, especially Grey County, had not completed any educational qualifications relative to men in Ontario and Canada, and relative to their female counterparts in Bruce and Grey counties. A high school diploma was the highest educational qualification among more men in Grey County relative to Bruce County, Ontario, and Canada. The proportions of adults whose highest educational qualification is a high school diploma are similar between men and women in the geographies presented. Relatively fewer men in Grey County had postsecondary qualifications than men in Bruce County, Ontario, and Canada. Men overall had fewer postsecondary qualifications when compared to women in the same region.

In Grey County, more women had not completed any educational qualifications, relative to women in Bruce County, Ontario, and Canada. A high school diploma was the highest educational qualification among relatively more women in Bruce and Grey counties than Ontario and Canada, and fewer women in Grey and Bruce counties had postsecondary qualifications than women in Ontario and Canada overall. Women overall were more likely to have postsecondary qualifications, about as likely to hold a high school diploma as their highest educational qualification, and less likely not to have completed any educational qualifications, when compared to their male counterparts in the geographies presented. See [Table 2](#) for a more detailed breakdown of postsecondary qualifications by sex (p. 9).

Figure 7. Educational attainment (%), adults aged 25-64, by sex, 2016

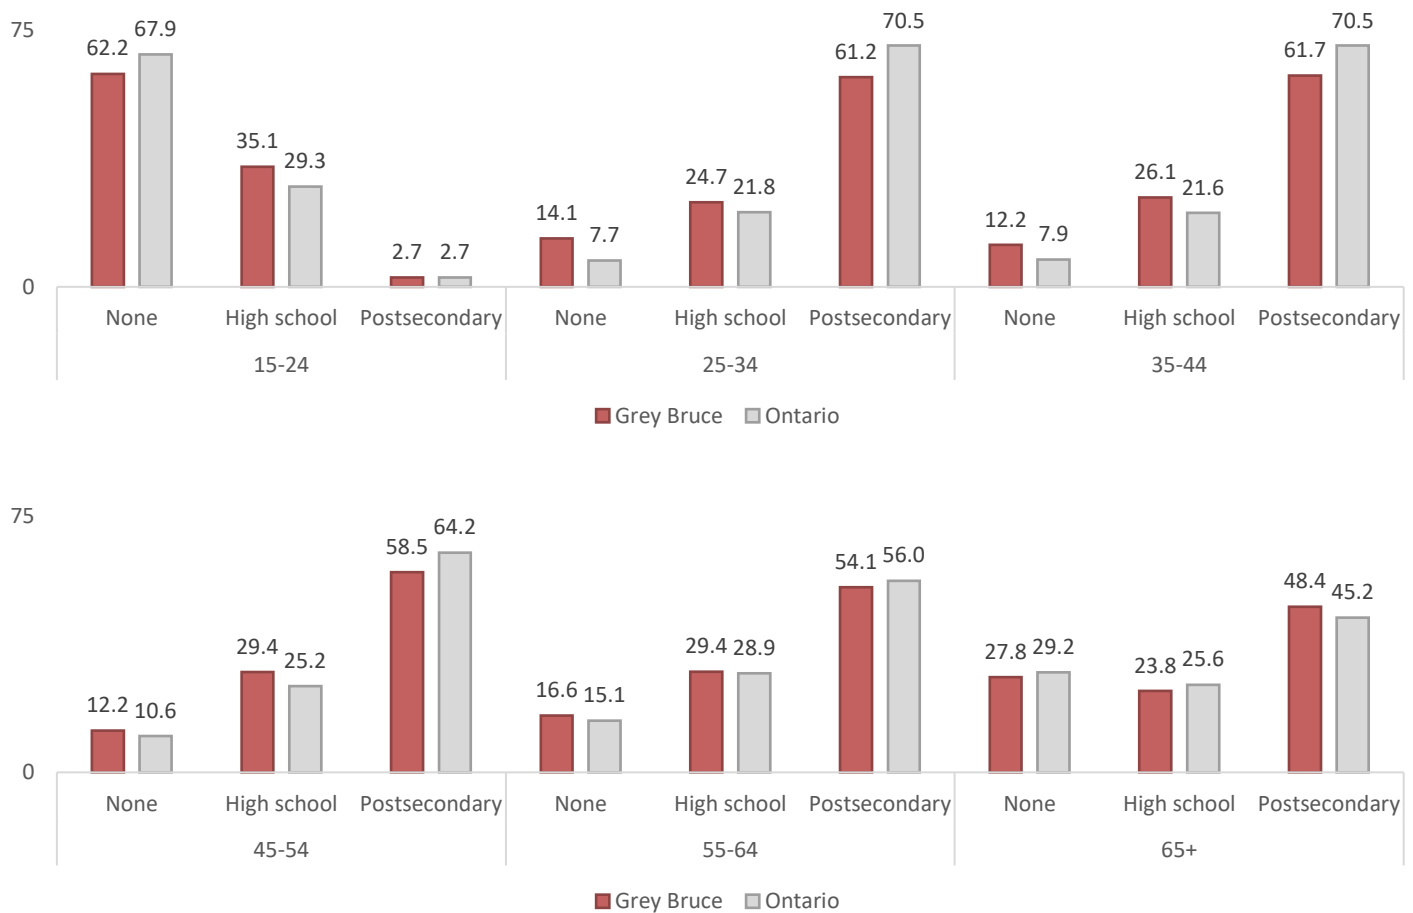

## Educational attainment: By age

Figure 8 compares educational attainment across age groups in Grey Bruce and Ontario. Grey Bruce residents tend to have fewer educational qualifications than Ontarians overall, but in the oldest age groups, educational qualifications are similar between Grey Bruce and Ontario, and in the youngest age group, Ontarians are more likely than Grey Bruce residents to have no educational qualifications. In 2016, more Grey Bruce residents had no educational qualifications when compared to their provincial counterparts in most age groups. Conversely, among the youngest (15-64), and oldest (65+) age groups, relatively fewer people in Grey Bruce had no educational qualifications when compared to Ontarians in the same age group.

Relatively more people in Grey Bruce hold a high school diploma as their highest educational qualification when compared to their provincial counterparts, except among the two oldest age groups. A high school diploma is the highest educational qualification among a similar proportion of 55-64 year olds in Grey Bruce and Ontario, and among fewer seniors (65+) in Grey Bruce relative to Ontario seniors.

More Ontarians have postsecondary qualifications when compared to Grey Bruce residents in the same age group, except among 15-24 year olds where the proportions are the same, and among seniors, where more seniors in Grey Bruce have postsecondary qualifications relative to Ontario.

**Figure 8. Educational attainment, by age group, 2016**

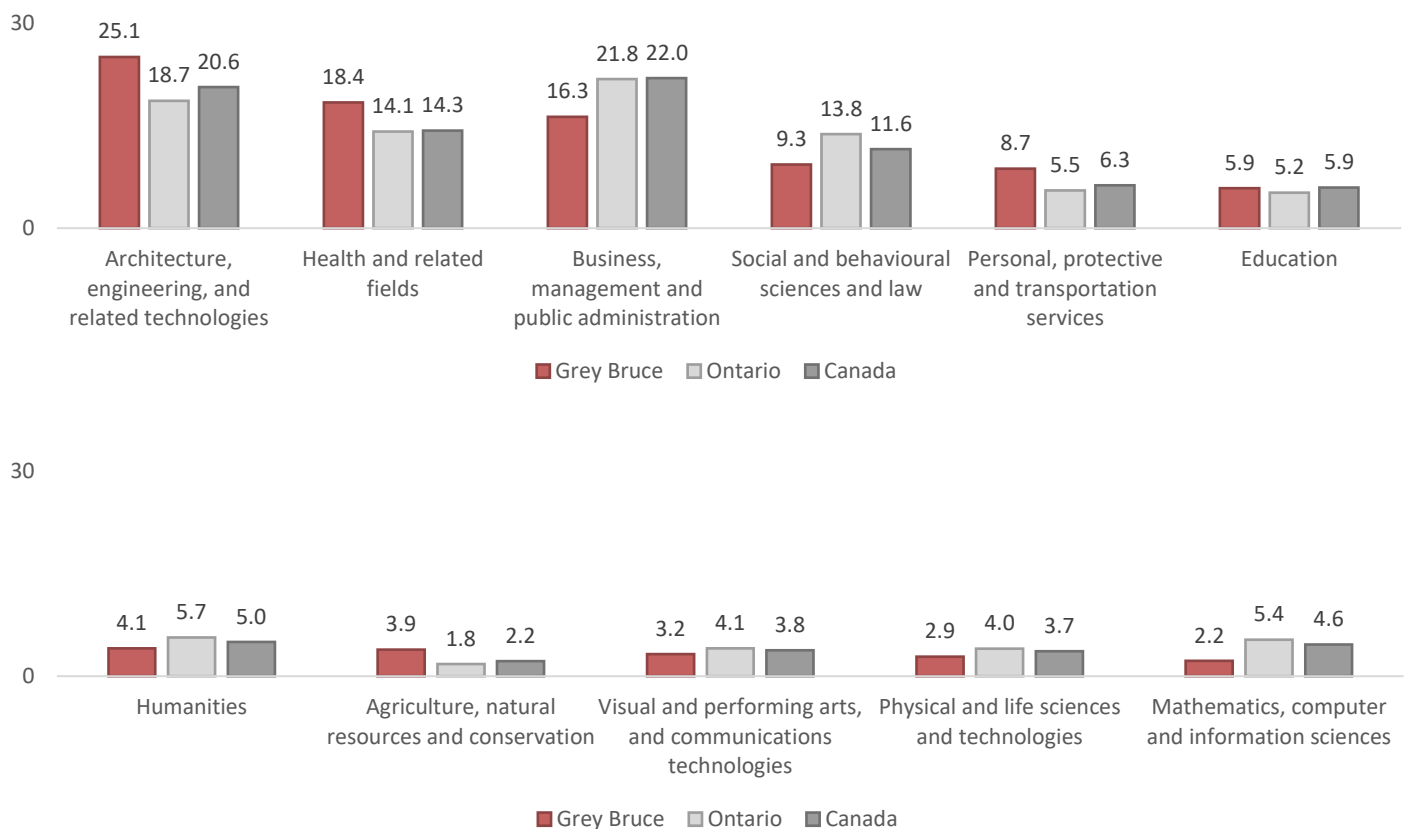

## Field of Study

'Field of study' refers to the discipline or area of learning or training associated with a particular course or program of study.<sup>1</sup> This indicator refers to the predominant discipline or area of learning or training of a person's highest completed postsecondary certificate, diploma or degree, classified according to the Classification of Instructional Programs (CIP) Canada 2016.<sup>1</sup>

Figure 9 displays the proportions 25-64 year olds with postsecondary qualifications for each major category of field of study. In 2016, one quarter of adults aged 25-64 with postsecondary qualifications in Grey Bruce earned their qualifications in the fields of architecture, engineering, and related services. Of these, most had studied mechanic and repair technologies, construction trades, and engineering technologies/related fields (Table 7). The next most common area of study among Grey Bruce adults with postsecondary qualifications was health and health-related fields, at 18.4%. Grey Bruce had more adults with postsecondary qualifications who studied architecture, engineering, and related technologies; and health and health-related fields relative to Ontario and Canada. Other areas of study that were more popular among graduates in Grey Bruce than Ontario or Canada were personal, protective, and transportation services, and agriculture, natural resources, and conservation. See Tables 5 and 6 for information about field of study at the municipal level (p. 11 and 12), and Table 7 for a breakdown of subcategories within each field of study (p. 13).

**Figure 9. Field of study, 25-64 year olds with postsecondary qualifications (%), 2016**

<sup>1</sup> Statistics Canada, 2016. *Dictionary, Census of Population 2016*. <http://www12.statcan.gc.ca/census-recensement/2016/ref/dict/index-eng.cfm>

## Location of study

Location of study refers to the location of the institution granting a person's highest certificate, diploma or degree, not the location of the person at the time he or she obtained the qualification or was attending the institution.<sup>2</sup> Ninety percent of Grey Bruce adults (25-64) with postsecondary qualifications earned their highest certificate, diploma, or degree from an institution in Ontario, while 4.3% earned their qualifications in another province or territory, and 5.7% earned their qualifications from an institution outside Canada ([Table 8](#), p. 14).

## Glossary

### Highest certificate, diploma or degree

This variable refers to the highest level of education that a person has successfully completed and is derived from the educational qualifications questions, which asked for all certificates, diplomas and degrees to be reported.

The general hierarchy used in deriving this variable (high school, trades, college, university) is loosely tied to the 'in-class' duration of the various types of education. At the detailed level, someone who has completed one type of certificate, diploma or degree will not necessarily have completed the credentials listed below it in the hierarchy. For example, a person with an apprenticeship or trades certificate or diploma may not have completed a high school certificate or diploma, nor does an individual with a 'master's degree' necessarily have a 'certificate or diploma above bachelor level.' Although the hierarchy may not fit all programs perfectly, it gives a general measure of educational attainment.

Remarks:

A. For this variable, the category 'High school diploma or equivalency certificate' includes persons who have completed the requirements for graduation from a secondary school or an equivalency certificate, but no postsecondary certificate, diploma or degree. Examples of secondary (high) school equivalency certificates are General Educational Development (GED) and Adult Basic Education (ABE).

B. The 'Certificate of Apprenticeship or Certificate of Qualification' category includes Journeyperson's designations. This category includes persons who have successfully completed a registered apprenticeship training program, consisting of supervised on-the-job training which may be accompanied by course work or 'in-class' technical training, and have received a Certificate of Apprenticeship (C of A) or a Diploma of Apprenticeship and/or a Certificate of Qualification (C of Q) or Journeyperson's designation (JP) in their trade. Certificates of Qualification and Journeyperson's designations in the trades are obtained after successfully passing a provincial/territorial examination. Candidates for the exam must have several years of work experience in the trade or have received their trades designation through a combination of on-the-job training and in-school training.

C. The category 'Other trades certificate or diploma' includes brief trade programs completed at community colleges, institutes of technology, vocational centres, and similar institutions. Persons who obtained trades qualifications from secondary-level vocational training programs in the province of Quebec, such as the 'Diplôme d'études professionnelles'/Diploma of Vocational Studies (DEP/DVS), are included in this category.

D. College, CEGEP and other non-university certificates or diplomas are obtained from: a community college; a CEGEP (both general and technical); an institute of technology; a school of nursing; a private business school; a private or public trade school; or a vocational school. Included in this category are teaching and nursing certificates awarded by provincial departments of education, with the exception of teachers' or nurses' qualifications obtained at university-affiliated faculties of education or nursing. College certificates or diplomas of two years or more usually have a minimum entrance requirement of a secondary (high) school diploma or its equivalent.

E. University certificates or diplomas (below or above bachelor level) are awarded for non-degree programs of study completed through a university. They are often connected with professional associations in fields such as accounting, banking, insurance or public administration. If the university certificate or diploma program does not require a bachelor's degree to enroll, then it is classified as below the bachelor level. If a university certificate or diploma program normally requires a bachelor's degree as a prerequisite, then it is classified as above the bachelor level.

F. University degrees are obtained through universities and other degree-granting institutions, including degree-granting colleges.
